Professional Summary

Data Engineer skilled in time-series analysis, predictive modeling, and automated data workflows, passionate about solving real-world industrial problems through data-driven insights. Experienced in building end-to-end data solutions, scalable machine learning systems, and production-ready pipelines, with hands-on exposure to cloud platforms, APIs, and modern development workflows.

Professional Experience

Data Engineer

Dubai, UAE

GAMA Security Systems

July 2025 – Present

- Built and maintained scalable data pipelines with Python, PostgreSQL, ClickHouse, and Apache NiFi, reducing data preparation time by 40% for analytics and ML workflows.
- Integrated multiple external APIs (DigiFort, SAFR, AxsonSoft, Vaidio) to ingest and normalize camera and alarm data, enabling real-time monitoring of over 500+ sites.
- Performed time-series validation and reconciliation across parallel ingestion pipelines, ensuring 99.9% data consistency in distributed systems.
- Developed machine learning models (XGBoost, Prophet) to forecast alarm events and detect anomalies, reducing false-positive alarms by 25%.
- Implemented Python-based ETL automation scripts, cutting manual data preparation by 60%.
- Designed secure streaming architecture using WebRTC, STUN, and TURN servers for remote camera monitoring.
- Developed Power BI and Qlik Sense dashboards that improved operational visibility and incident response time by 30%, then led the migration of the BI stack to Apache Superset for enhanced scalability.

Data Analyst / Power BI Developer Intern - Retail

Dubai, UAE

Smartix Smart Infocomm

Nov 2024 – June 2025

- Conducted sales analysis across 10+ retail locations, improving stock allocation efficiency by 25%.
- Analyzed product performance for 500+ SKUs to support inventory planning and promotional decisions.
- Developed automated Power BI dashboards tracking sales velocity, inventory turnover, and profitability metrics.
- Assisted in demand forecasting using historical sales trends, reducing stockouts and overstocking during peak seasons.
- Partnered with marketing team to measure promotion impact on product sales, analyzing 50+ campaigns and providing recommendations that improved campaign ROI by 22%.
- Ensured accurate tracking of stock movement, identifying discrepancies between recorded and actual inventory levels, reducing inventory shrinkage by 15% through early detection.

Data & Operations Intern

Dubai, UAE

BAASS Shipping LLC

Apr 2024 – Oct 2024

- Managed operational and shipment-related datasets, ensuring accurate tracking of logistics records and delivery workflows.
- Assisted in preparing operational reports and Excel-based dashboards for shipment monitoring and client updates.
- Coordinated with operations teams to maintain data consistency across invoices, shipment schedules, and inventory records.
- Supported process optimization initiatives by identifying delays and inefficiencies in logistics workflows.

Education

Middlesex University, Dubai
BEng (Honors) Computer Systems Engineer - First Class Honours

Year of Graduation: 2025

Our Own English High School, Sharjah
CBSE Curriculum

Year of Graduation: 2021

- Grade 12 - 92%
- Grade 10 - 95%

Projects

LLM-Powered Trading Data EDA Agent

Nov 2025 – Dec 2025

github.com/AbhinandSunil/EDA-Agent [↗](#)

- Developed an LLM-driven exploratory data analysis agent to automate cleaning, statistical profiling, visualization, and insight generation for trading datasets.
- Implemented anomaly detection and time-series trend analysis using Python, Pandas, and Matplotlib.
- Integrated GPT-based summarization to generate analyst-style reports and potential trading insights.

AI-Powered Process Watchdog for Windows Applications

Sep 2025 – Oct 2025

github.com/AbhinandSunil/AgentWatchDog [↗](#)

- Built a self-healing Python agent to continuously monitor critical Windows services.
- Integrated a local LLM to analyze logs and generate automated recovery decisions.
- Developed diagnostic reporting with SQLite event history and JSON-based escalation workflows.

NaviGreen – Sustainable Transportation App

Nov 2023 – Apr 2024

github.com/AbhinandSunil/NaviGreen [↗](#)

- Developed a React Native application for eco-friendly route optimization and commute tracking.
- Built TensorFlow models to classify transportation modes and compute sustainability scores.
- Implemented backend analytics pipelines using Flask, Python, Pandas, and Matplotlib.

Technical Skills

Programming & Data: Python, SQL, Pandas, NumPy, Scikit-learn, Data Cleaning, Feature Engineering, Statistical Analysis, Time-Series Forecasting (Prophet, XGBoost)

Machine Learning & AI: TensorFlow, XGBoost, LLM APIs (OpenAI), Prompt Engineering, Agentic AI Workflows, Forecasting & Anomaly Detection Models

Data Engineering & Infrastructure: PostgreSQL, ClickHouse, Apache NiFi, Apache Spark, Apache Airflow, Kafka, ETL Pipelines, REST APIs, Docker, Real-Time Data Processing

Visualization & Tools: Power BI, Qlik Sense, Apache Superset, Matplotlib, Seaborn, Git, Linux, DBeaver, Postman, VS Code, SQLite, Azure Fundamentals

Systems & Networking: WebRTC, STUN/TURN, MQTT, BACnet, Modbus, SIA Protocols, NAT Traversal, Distributed Streaming Architectures

Soft Skills: Proactive problem-solving, Cross-team collaboration, Technical documentation, Fast learner in emerging AI systems

Certifications

- Programming Essentials in Python – Cisco Networking Academy
- Oracle Java Pathway – Cisco Networking Academy
- Azure Data Fundamentals
- Udemy (Data Science, Machine Learning, Data Analysis, Python & R)
